

## PEX & PE-RT Tubing Pipe Supports

CATEGORY 039

A galvanized-steel channel, designed for non-combustible environments, securely grips both crosslinked polyethylene (PEX) tubing and Polyethylene of Raised Temperature Resistance (PE-RT) tubing. This channel ensures consistent support for the tubing, enabling hangers to be placed similarly to metallic pipe installations. The low-profile design allows for insulation of both the pipe support and the tubing within standard (CTS) pipe insulation. Available in lengths of 9 feet, the Pipe Support comes in various sizes to accommodate different tubing dimensions.

### FEATURES & BENEFITS

- Size options range from 1/2" to 3"
- Crafted from galvanized 23-gauge steel
- Maintains pipe alignment and direction
- Self-gripping design ensures continuous support, preventing sagging and snaking
- Easy to install, lightweight, and can be cut with hand tools
- Low-profile design enables insulation of the pipe support along with the tubing within standard CTS pipe insulation
- Can be used with ASTM E84 and CAN/ULC S102.2 rated PEX and PE-RT in plenum applications

### Available Sizes

Diameter	Length
1/2"	9ft.
3/4"	9ft.
1"	9ft.
1-1/4"	9ft.
1-1/2"	9ft.
2"	9ft.
2-1/2"	9ft.
3"	9ft.
