

## MATERIAL SPECIFICATION SHEET

### Icemaker Tubing

Engineered for safe, efficient water delivery to residential and commercial ice makers.

CB Supplies Icemaker Tubing is designed for reliable cold-water supply connections to residential and commercial ice makers. Manufactured from durable PE4710 high-density polyethylene (HDPE), this flexible tubing provides dependable performance for low-temperature water applications and is supplied in convenient 100 ft coils for ease of installation.

### Product Details

- Material complies with NSF/ANSI/CAN 61 health effects requirements when tested at 73°F (23°C)
- Pressure rating: 160 psi at 73°F (23°C)
- 1/8" CTS sizing with SDR 6.5 dimensioning
- 1/4" outside diameter (OD)
- Available in 100 ft coils
- Natural-coloured, single-wall construction
- Intended for cold-water applications only
- Resists exposure to chlorine, acids, and alkalis
- Disconnect power and water supply to the appliance before servicing

Ensure all connections are secure and leak-free before placing the appliance into service. Follow appliance manufacturer recommendations and local code requirements.
